330 Days: the Uncensored War in Iraq

Controversial New Book Delivers Groundbreaking Perspective on Iraq War

NEW YORK, April 13, 2011 /PRNewswire/ -- Never before have civilians been able to fully appreciate a soldier's perspective of the military campaign in Iraq. Powerful images of war, from suffering and death to courage and freedom, are ingrained forever in these soldiers' minds. **330 Days: The Uncensored War in Iraq** brings the reader to the front lines, revealing the evocative images of warfare. The 256-page photo documentary features uncut and uncensored original photographs from the war, accentuated by the harrowing stories told first-hand by the men who captured and lived through them.

Co-authored by Army Combat Engineer Pvt. **Christopher Durante** and Halliburton Contractor **Julian Van Bellinghen**, **330 Days: The Uncensored War in Iraq** is a historical depiction seen through the eyes of those deployed on the ground in Iraq, allowing civilians an authentic glimpse into the chaos and comradeship in the midst of battle.

"It is certainly not for the fainthearted as it contains some extremely poignant, but necessary, images of dismembered bomb victims and those caught in street fighting and ambushes," wrote reviewer **Robert Bluffed** of **Bookpleasures.com**. *"There is little need for words because the images, in the main, speak volumes about the total barbarity of war. The book is hard-hitting, harsh and concerning and clearly will shock, but they show some of the real dangers the coalition troops were exposed to in Iraq and now in Afghanistan."*

Uncut and uncensored, **330 Days: The Uncensored War in Iraq** captures personal narratives of the heroes who fought in Iraq and delivers the graphic truth about war that provokes controversy and public discussion. The book is as enlightening as it is controversial about the most prolific topic of the last decade.

This is essentially a picture book that documents the coalition's involvement in Iraq from the US soldier's viewpoint. It is certainly not for the faint hearted as it contains some extremely poignant, but necessary, images of dismembered bomb victims and those caught in street fighting and ambushes. The only text contained in the book is short and forms only the captions that explain each of the photographs, but there is little need for words because the images, in the main, speak volumes about the total barbarity of war. The book is hard hitting, harsh and concerning and clearly will shock but they show some of the real dangers the coalition troops were exposed to in Iraq and now in Afghanistan.

330 days (presumably the period one of the authors served in Iraq) sets out to put the viewer on the front line by attempting to show the realities of a

country that will probably never recover from the devastation caused by a dreadful regime and a tyrant leader that was devised to release the Iraqi people. It has failed of course and while there are the infighting between the Ba'ath, Sunni and Shia continues there will never be peace. The images, taken by active soldiers with ordinary inexpensive cameras, as the co-authors state, are of a kind that any newspaper would never dare publish, and they are right. The nature of many of the photographs will, no doubt, also cause embarrassment for the US Government who dislikes the true horrors of the conflict being exposed to the electorate.

The authors are clearly making a statement by publishing this book but it does leave me wondering who will buy it? As a documentary of what US military personnel have experienced on the streets of Baghdad it works well but I am not quite sure where, because of the gruesome images contained in the book, will fit into most buyers' bookcases. The cover should, in any event carry a public warning because some people who open the book will be disturbed by many of the photographs that show blown off body parts and entrails that are the result of a violent explosion of shooting. Nevertheless, there is bound to be an audience for a book that holds back no punches to reveal reasons why so many coalition troops have been psychologically damaged by their experiences in this war.
